FEELING

FEELING

Feeling enhances the ambiance of outdoor spaces like terraces and gardens, transforming them into cozy, comfortable settings reminiscent of indoor areas. This decorative lighting family combines a minimalist design with elegant, charming ambient light, suitable for outdoor environments.

Available as either a wall or ceiling mount or as a garden stake, Feeling offers versatile installation options. In its applique form, the slender stem is capable of two distinct movements. The first rotation around its axis allows users to adjust the direction of the light beam, creating various lighting effects such as direct, indirect, or lateral. The second rotation pivots around the fixing joint, enabling the light to shift from a vertical to a diagonal or horizontal position.
