

GHOST

GHOST

Unique lighting system for wall recessed lighting in exterior applications.

The system consists of a series of concrete forming boxes designed to create a cavity in the wall during the concrete forming process.

The resulting void in the wall houses the LED light module, which is concealed from view.

Designed for low mounting heights with downward asymmetric light distribution. Low luminance with light source regressed inside the luminaire and shielded from all viewing angles.

SPECIFICATIONS

3 to 24 Watts

Up to 635 lumens

80 CRI

3000 / 4000 K

HORIZONTAL

SQUARE
