

Feeling enhances the lighting of outdoor spaces such as terraces and gardens, making them cosy and comfortable as if they were indoor spaces. A decorative lighting family for outdoors with a minimalist design for an elegant and charming ambient light. Feeling can be wall or ceiling mounted, or it can be installed directly in soil using the Garden Stake model. In the wall and ceiling mounted option, its thin stem can perform two different rotations: the first one, around its own axis, allows to direct the light beam, creating direct, indirect or lateral light effects; the second rotation, around the fixing joint, moves the lighting from a vertical position to a diagonal or horizontal position.
